Custom-Made Retractable Screens and Awnings

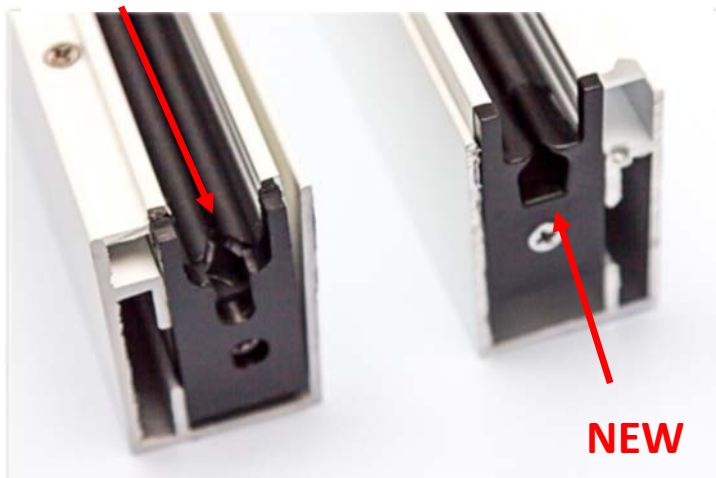

NEW Recessed Funnel Cap – Feb 1, 2018

At Rainier Industries, we are constantly striving to improve our products. Over the last few years, we have received great feedback on the modified funnel cap for our surface track screens, so we have now applied that same feature to our recessed screens.

Starting on Feb 1, 2018, all new recessed screen shipments will feature the new funnel cap. This will allow the fabric to feed correctly every time and lead to a significant decrease in the number of service calls due to fabric misfeed after installation.

These illustrations show the changes:

Note the consistency of the opening on the new molded piece, compared to the old hand-cut notch in the PVC insert.

New, clean, and better fitting pieces also on the bottom of the tracks.
